Summary

Health and safety business leader motivated to continually improve workplace environments with experience solving difficult problems for national and international clients. Successfully managed multiple priorities and implemented successful control improvement strategies that reduced risks for business losses at thousands of businesses across the United States.

- Excellent safety and health knowledge of legal and recommended standards.
- Strong oral and written communication skills with the ability to successfully communicate difficult technical issues with all levels of employees and management.
- Systems approach to problem solving to identify cost effective solutions that reduce business risks.
- Excellent trainer able to assess audiences and communicate issues in a manner that is easily understood.
- Independent self-starter and leader able to assess and resolve issues and communicate as appropriate for each situation.
- Strong technical skills and ability to utilize technology to manage and communicate data.
- Interested in emerging technology and worldwide regulatory developments that may impact customers and reduce workplace injuries and illnesses.
- Certified in comprehensive practice for Industrial Hygiene, Safety, Hazardous Materials Management and Ergonomics Management (CIH, CSP, CHMM and CEM).

CIH Service, LLC

October 2000 – Present

Established and operated an industrial hygiene and safety consulting practice with emphasis on management and control of air quality, noise and heat stress issues.

- Consulted nationwide with industrial, commercial and residential customers on comprehensive safety and health issues for compliance with legal and recommended standards.
- Deposed and testified as an expert witness on various health issues such as noise, carbon monoxide and mold.
- Developed and provided training on regulatory topics such as respiratory protection, silica and noise. OSHA authorized trainer for General Industry regulations.
- Assisted several national associations with development of product MSDSs.
- Provided multiple presentations on the impact of silica exposure considerations as a guest speaker at a national masonry association convention.

Kevin Campbell, CIH, CSP, CHMM, CEM

- Assisted national leader in masonry products industry with development, implementation and auditing of dust control program for silicosis prevention.
- Customized and conducted “Mock OSHA Inspections” to assist customer personnel with preparations and conduct for regulatory inspections.
- Successfully assessed and communicated results on a unique lead exposure situation to help resolve difficult issues between two opposing parties without the need for legal remedy by either party.
- Presented “IH Issues in Ergonomics” topic at multiple Certified Ergonomics Manager training and certification courses as part of a joint training partnership between Eastern Kentucky University and Ergonauts Performance Technologists.
- Marketed and sold consulting services in profitable markets. Maintained and directed all aspects of business operations such as taxation, contracts and legal documentation.
- Consulted on IH issues such as mold, indoor air quality, silica, noise, hexavalent chromium, lead, lab safety, solvents, carbon monoxide and heat stress. Consultations included evaluations, control recommendations, program development, auditing, management and employee training and education.

Liberty Mutual Insurance- Loss Prevention Department

1987- 2000

- Managed delivery of industrial hygiene services in Tennessee, Kentucky and portions of border states.
- Trained and assisted multiple loss prevention personnel in each state for identification and management of industrial hygiene exposures with input on performance for compensation and development.
- Developed and successfully implemented a qualitative industrial hygiene exposure assessment program similar to the “control banding” technique that is currently popular in the industrial hygiene profession.
- Repeatedly recognized and rewarded as a leader and top performer in the TN-KY Loss Prevention unit.
- Selected as a trainer for IH topics at multiple Regional Safety Training seminars.
- Requested by multiple national customers to be the sole IH service provider.
- Obtained CIH and CSP designations while exceeding company standards for production, quality and professionalism.

United Parcel Service- Cookeville, TN

1986-1987

- Assisted residential, commercial and industrial customers with timely, accurate delivery of customer packages.

Icicle Seafoods – Seward, AK

1981-1986

- Involved in all phases of seafood production such as loading/unloading ships, processing and shipping seafood products, and preparation, assembly and cleaning of processing equipment. Assisted with preparations for OSHA and FDA inspections.

Kevin Campbell, CIH, CSP, CHMM, CEM
